

# Style transfer for human motion with transfer with adversarial learning

Seminar

Sebastian Stelter

Universität Hamburg

Dept. Informatik – Knowledge Technology, WTM

KNOWLEDGE  
TECHNOLOGY

<http://www.informatik.uni-hamburg.de/WTM/>

# Outline

- 1 Motivation
- 2 Network Architecture
- 3 Implementation
- 4 Results
- 5 Evaluation

# Outline

- 1 Motivation
- 2 Network Architecture
- 3 Implementation
- 4 Results
- 5 Evaluation

# Motivation

- Generating motions is hard
- No cheap and fast alternatives
- Flexibility

[1]

# Dataset

## EMILYA Dataset

- Biovision Hierarchical Data (**.bvh**)
- Calibration data in same file
- Metadata, then keyframed joint positions
- 8206 samples, 11 actors
- 8x7 different combinations

## Body Movement Library

- Character Studio Marker (**.csm**)
- Separate files with calibration data
- Metadata, then keyframed joint positions
- 1323 samples, 30 actors
- 5x5 different combinations

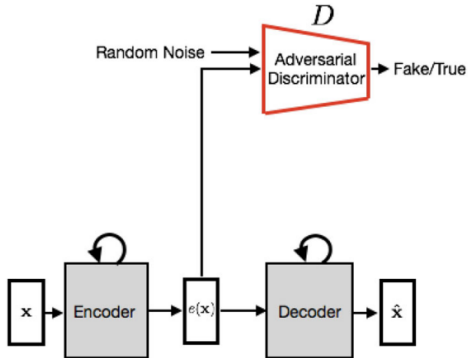

# Outline

- 1 Motivation
- 2 Network Architecture**
- 3 Implementation
- 4 Results
- 5 Evaluation

# Network Architecture

# Network Architecture

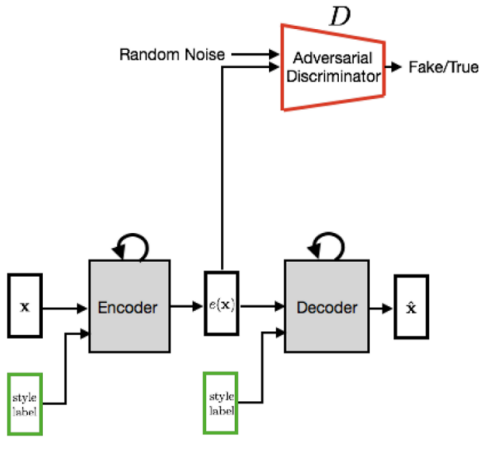

[2]

Style transfer for human motion with transfer with  
adversarial learning

# Network Architecture

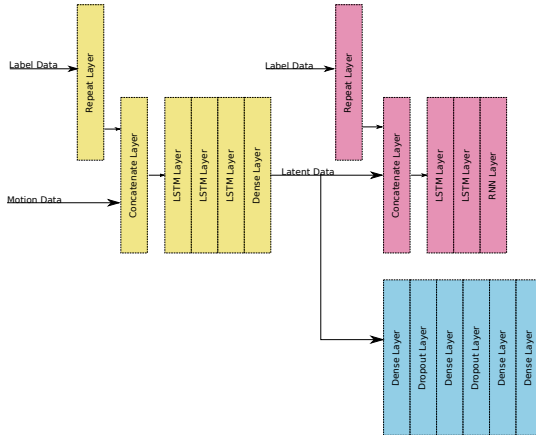

Style transfer for human motion with transfer with  
adversarial learning

# Outline

- 1 Motivation
- 2 Network Architecture
- 3 Implementation**
- 4 Results
- 5 Evaluation

# Implementation

Style transfer for human motion with transfer with  
adversarial learning

# Outline

- 1 Motivation
- 2 Network Architecture
- 3 Implementation
- 4 Results**
- 5 Evaluation

# Target

# Result

# Outline

- 1 Motivation
- 2 Network Architecture
- 3 Implementation
- 4 Results
- 5 Evaluation**

# Reasons for Failure

- Smaller dataset
- No consideration for calibration data
- Network size
